

# SLIDING PATIO DOORS

Create a feeling of light and space using an expanse of uninterrupted glass with the REAL Aluminium Sliding Patio Doors.

The technical design of the REAL Aluminium Sliding Patio Doors make them ideal for large-span areas and situations where bi-folding doors may not be so appropriate such as areas exposed to high winds or upper floor apartments. A Sliding Patio Door will offer you the largest uninterrupted glass area and once open doesn't take up room on a patio or balcony, or inside the home.

Made-to-measure and fitted to the highest standard, the REAL Aluminium Sliding Patio Doors deliver optimum performance. Tested to the highest industry standards, REAL Aluminium Sliding Patio Doors easily glide with guaranteed reliability. The strong, thermally efficient aluminium frames create dramatic sliding sashes with large glass areas without compromising thermal performance or weather resistance.

Using advanced glass technology and superior insulation to keep your home warm, the REAL Sliding Patio Doors form a thermally efficient glass facade, a wonderful way to flood a space with light and enjoy beautiful views.

Available in two, three, four, or six panels, all patio doors are double- or triple-glazed with special sliding mechanisms to enable even the largest sashes to slide open and close smoothly on a double- or triple-track, whatever their size.
