

Many thanks for downloading our general enquiry form.

The idea of this form is to enable us to provide you with an initial quotation, if you are unable to send us technical drawings. From experience, our preliminary quotations are usually within 5% of the final quotation.

If our initial quotation is of interest to you and you would like to proceed 'in principle' to the pre-order stage, then a detailed survey will need to be carried out.

Please be aware that the information you provide in this general enquiry form will not be used to place an order. So if you are not sure whether the information you have provided is correct, don't worry.

The more information you can provide, the more accurate the initial quotation will be. If you are not sure, please do not hesitate to contact us. We are more than happy to provide you with guidance and suggestions.

We will contact you if we feel we need more information.

When you have completed the form, please scan and email it to [enquiries@alufen.co.uk](mailto:enquiries@alufen.co.uk). Alternatively, you can post it to our regional address, which you will find at the bottom of this page.

Kind regards

David Taylor  
Business Development Manager
